

#### **CIRTEM**

#### Presentation

Power electronics

System engineering

Objective: Create power converters and global solutions for an optimized management of electric energy flow

- ✓ Turn over 2024 € 6M
- ✓ 53 employees, including 28 R&D
- ✓ Premises 2 400 m<sup>2</sup>
- ✓ Small & Medium volumes
- Location Toulouse area
- ✓ ISO 9001 (2021)
- ✓ Innovative applications
- ✓ Demanding markets

### **CIRTEM - POWER ELECTRONICS SPECIALIST**

# Our plant – Our Team

- √ New building 2025 3 200 m²
- ✓ SMD line
- Automated assembly lines

## **History**

### Customers - Company key events

Mobility – Defence - Energy E/E Systems & Products

#### Markets

## Multi-sectorial approach

Mobility

**Speed variators** 

DC/DC & Chargers

**ICE & Hybrid Control** 

Supervision

Defence

**On-board networks** 

**Powertrain** 

Storage

**Protections** 

Electrical infrastructure

**Smart Grids** 

Micro Grids

R

**Fast charging** 

Industry

**Process Power Supply** 

**Ozonation** 

High voltage power supply

Induction

# **Power Converters and Electronic Equipments**

### Mission

#### Added value

### **System Engineering**

Architecture optimization

Tailored help

Preliminary specification

#### **Development**

Simulation

Power design

Mecatronics

Software

#### **Production**

Small and mid series

One-shot product

Prototypes

#### **Build-to-print**

Specialized subcontracting

Test bench development

#### **Pre-study**

Technical feasibility

**Budgetary cost** 

**Detailled specification** 

## Industrialization

Optimized supplies

Semi-automated assembly

Automated testing

#### **MCO**

Obsolescence monitoring

Redesign

Components storage
